

REVIEW

of the educational and professional program «Preschool Education»
of the first (bachelor's) level of higher education
in the specialty 012 Preschool education
in the field of knowledge 01 Education / Pedagogy

The organization and implementation of the educational process in institutions of higher education is regulated by regulatory and legal documents, one of which is the educational and professional program. The educational and professional program «Preschool Education» for students of higher education of the first (bachelor's) level of training in the specialty 012 Preschool Education at the Izmail State University of Humanities was submitted for review in accordance with the requirements of the Law of Ukraine «On Higher Education», the Standard of Higher Education in the specialty 012 Preschool education of the field of knowledge 01 Education/Pedagogy for the first (bachelor's) level of higher education and the Professional standard «Preschool teacher».

The structure of the educational and professional program is clearly and logically built. The purpose of the program is outlined, a detailed description of graduate employment opportunities is provided, and the methods of teaching and evaluating the educational achievements of the graduates are defined. The content of the program allows to ensure the competitiveness of graduates in the market of educational services.

The carried out analysis of the educational and professional program gives reasons to assert the relevance and perspective of training students of higher education under the educational and professional program «Preschool Education» of the first (bachelor) level of higher education, specialty 012 Preschool education, field of knowledge 01 Education / Pedagogy at the Izmail State University of Humanities.
